TrackStat Program Instructions

Installation Requirement:

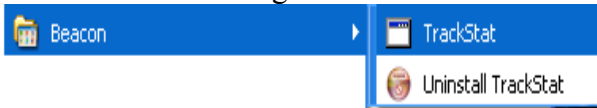

Download Microsoft .NET Framework 3.5 **before** installing TrackStat program

Installation Procedures:

1. Click on the .exe file to install the program and follow installation steps.

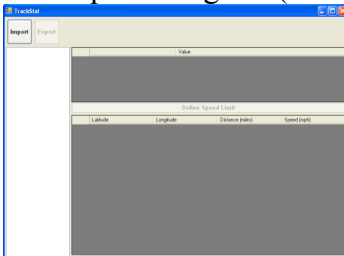

2. The program will be installed in a directory under the Start menu-> All Programs -> Beacon

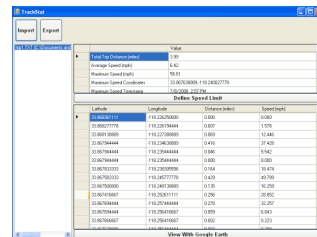

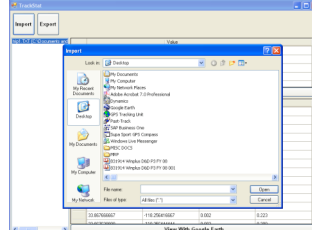

Operation Procedures :

1. Open the GPS Tracking System software
2. Download and Select Trace
3. Export Trace to a Text File w/ Waypoints
4. Run the Speed Program (TrackStat)

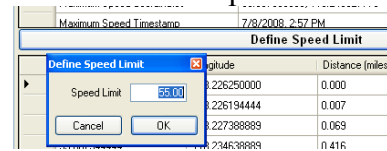

5. Import the exported file

Features:

- Import and view multiple data files
- Define Speed Limit – View how many times the vehicle drove pass a certain speed.

| Latitude | Longitude | Distance (miles) | Speed (mph) |
|-------------|---------------|------------------|-------------|
